Century II

The Century II offers two completely private and self-contained restrooms. The 370 gallon holding tank is made from 3/8" polyethylene and resists solvents, acids, and other cleaners. With an average capacity of 1,100 plus flushes, it's perfectly designed for small to mid sized events.

Optional W/ two built-in showers:

Century III

The Century III was designed around bigger gatherings. with three completely private and self-contained restrooms and a 500 gallon holding tank, it can accommodate up to 1,500 flushes. It features the same easy to clean interior, easy maintenance, and set up exterior of the Century II in a larger event handling frame.

Optional W/ three built-in showers:

Denali

The Denali offers a more free flowing environment with easy entry and exit doors on each side, while still keeping the same easy to clean and sanitize wall, counter, and floor surfaces.

The Denali can accommodate up to four women (four separate stalls & two sinks) and six men (three stalls, three urinals and two sinks) at any time. The 740 gallon waste tank can handle up to 2,200 flushes.

Optional W/ built-in showers:

Century V

The Century V is the largest of the single bathroom cubicle models we build. It was designed around the largest gatherings we could think of such as corporate golf outings, upscale special events, state fairs, etc.

With five completely private and self-contained restrooms and 2 - 3/8 polyethylene holding tanks and over 850 gallons of capacity, the Century V can accommodate up to 2,600 flushes.

Optional W/ five built-in showers:
